Instructions to run app

- Download zipped folder and unzip to access python file and images folder.
- Attached will be a folder that includes the python file named "Mamaka Bowls Final MVP" and an images folder named "images" that includes images used in the app.
- When running the app, ensure that the images folder is in the same directory as the python file so the python file can access the images as instructed in the code. As in the code, the program searches for a folder called "images" within the same directory to pull the application images from.
